Also, we make sure the entire informational chain is secure.

– Code. We balance blockchain code with the regular centralized approach: blockchain holds the bare minimum for our system to be fully trustworthy, and the servers are responsible for complex parts and interfaces. For the Crowdsale, we use straightforward, smart contracts proven safe at other projects.

– Servers. We do our best to protect our servers from external attacks (DDoS protection, code audit) and internal attack propagation (compartmentalization, event monitoring).
